

Codes for typing accents on computers

PCs

Press the ALT button, then using the number pad on the right of the keyboard type the code given before lifting the ALT button. Remember, do not use the numbers aligned above the letters on the keyboard, and make sure that the NUM LOCK function on the number pad is active.

é = ALT 130	ï = ALT 139
â = ALT 131	î = ALT 140
à = ALT 133	ô = ALT 147
ç = ALT 135	û = ALT 150
ê = ALT 136	ù = ALT 151
ë = ALT 137	« = ALT 174
è = ALT 138	» = ALT 175

Macs

Hold down the OPTION key on the keyboard and then strike the character key indicated in the table below. Nothing will appear on your screen. Next release both keys, and type the letter that should carry the accent.

é = OPT e + e	ï = OPT u + i
â = OPT i + a	î = OPT i + i
à = OPT ` + a	ô = OPT i + o
ç = OPT + c	û = OPT i + u
ê = OPT i + e	ù = OPT ` + u
ë = OPT u + e	« = OPT + \
è = OPT ` + e	» = OPT + SHIFT + \
